

APPLICATION ENGINEER

LOCATION: Home Office (Preferred: Greater Boston Area, MA or Greater Miami Area, FL)

POSITION DESCRIPTION: Front End Analytics LLC is looking for a dynamic customer-centric application engineer. The successful candidate will work with our team to identify, propose and implement solutions in our customers' digital transformation journey. Tasks include working with advanced computational tools such as Abaqus to solve complex nonlinear problems for our customers.

REQUIRED SKILLS:

- BS (MS or PhD preferred) in Mechanical Engineering or closely related field.
- Experience with ABAQUS or ANSYS
- Experience with Python Scripting
- Experience with SOLIDWORKS, CATIA or PRO-E
- Outstanding interpersonal, planning and problem-solving skills
- Excellent English written and verbal communication skills
- Ability to travel 30% of the time.

DESIRED SKILLS:

- Experience with other SIMULIA products such as: ISIGHT, TOSCA, and FE-SAFE

COMPANY PROFILE: Front End Analytics LLC helps its customers dramatically increase their product development velocity, products' quality and innovative edge. To achieve this competitive advantage, Front End Analytics LLC offers end-to-end software and consulting services in the areas of: ***Product Design, Engineering Simulation, Engineering Democratization, and Predictive Analytics.***
